2SKY MOBILE

eSIM Store Platform
Web + Mobile Application

TECHNICAL DEVELOPMENT BRIEF

CONFIDENTIAL

Please complete all sections. Fields are editable — click to type. Checkboxes are clickable.

1. COMPANY OVERVIEW

Company Name *Full legal entity name*	Esim souf
Country of Registration *Jurisdiction of incorporation*	Algeria
Business Purpose *What business problem does the eSIM Store solve?*	A lot of people are traveling to neighboring countries and other countries and found out that the internet
Target Markets *Primary regions, countries, continents*	North African countries (Tunisia, Libia, Egypt), Turkey, E
Target Audience	☑ B2C Travelers ☑ B2B Enterprise ☑ B2B2C White-label ☐ Other
Expected MAU (Year 1) *Monthly active users for capacity planning*	500 users and gradually increase monthly
Expected Transactions / Mo *Purchase volume for infrastructure sizing*	2000 GB and gradually increase monthly
Existing Infrastructure *Existing websites, apps, APIs, backend systems?*	App

2. FUNCTIONAL REQUIREMENTS

2.1 Core Features

Confirm required features. Check boxes and add notes in text fields.

eSIM Package Catalog *Browse by country, region, data volume, validity*	
User Registration & Auth *Email, social login, phone OTP — specify methods*	
User Personal Account *Profile, purchase history, active eSIMs, balance*	
Admin Panel *User/order management, catalog CRUD, analytics dashboard*	
Payment Processing *Stripe, PayPal, Apple Pay, Google Pay — specify*	
eSIM Provisioning API *2Sky API, Airalo, CELITECH — specify provider APIs*	
Multilingual Support *List required languages. RTL support needed?*	

Notifications
Push, email, SMS — transactional + marketing

Promo / Referral System
Promo codes, referral links, bonus credits, loyalty

Blog / Content Section
News, help center, FAQ, destination guides

2.2 Advanced Features

AI Customer Support
LLM chatbot (GPT-4o / Claude). Escalation to humans.

Live Chat / Helpdesk
Intercom, Zendesk, or custom?

eSIM Status Tracking
Real-time: provisioned, active, data remaining, expiry

Data Usage Dashboard
Visual usage tracking, alerts at 80% / 100%

Auto Top-Up
Automatic renewal or data top-up before expiry

eSIM Installation Wizard
Step-by-step setup with device-specific instructions

User Analytics
Behavioral analytics, cohort analysis, funnels

A/B Testing Engine
Experiment framework for pricing, UI, onboarding

3. TECHNOLOGY STACK & ARCHITECTURE

3.1 Recommended Stack

We recommend the following stack. Enter your preference in the third column.

Layer	Recommended	Your Preference
Frontend — Web	*Next.js 14+ (React, TypeScript, Tailwind)*	
Frontend — Mobile	*React Native or Flutter*	
Backend API	*Node.js (NestJS) or Go — microservices*	
Database — Primary	*PostgreSQL 16+*	
Database — Cache	*Redis 7+ (sessions, rate limits, cache)*	
Search Engine	*Elasticsearch / Meilisearch*	
Message Queue	*RabbitMQ / Apache Kafka*	
File Storage	*AWS S3 / Cloudflare R2*	
CDN	*Cloudflare / AWS CloudFront*	
CI/CD	*GitHub Actions / GitLab CI*	
Monitoring	*Grafana + Prometheus / Datadog*	
Error Tracking	*Sentry*	

3.2 Infrastructure & Capacity

Cloud Provider ☐ AWS ☐ GCP ☐ Azure ☐ Hetzner ☐ Other

Deployment Model ☐ Kubernetes ☐ Docker Compose ☐ Serverless

Region Strategy
Primary region + edge locations

Expected Peak RPS
Requests per second at peak

Uptime SLA Target ☐ 99.9% ☐ 99.95% ☐ 99.99%

Database Sizing
Data volume: Year 1 and Year 3

Auto-scaling Policy
CPU/memory thresholds, min/max instances

Backup & DR
RPO/RTO targets. Cross-region replication?

Environments ☐ Development ☐ Staging ☐ UAT ☐ Production

3.3 Backend Architecture

API Architecture	☐ REST ☐ GraphQL ☐ gRPC ☐ Hybrid
Authentication	☐ JWT + Refresh Tokens ☐ OAuth 2.0 ☐ Session-based
API Rate Limiting *Per-user / per-IP limits*	
API Versioning	☐ URL-based (v1/v2) ☐ Header-based

4. INTEGRATIONS

4.1 eSIM Provider APIs

Primary eSIM Provider
Provider name and API version

Provisioning Flow ☐ QR Code ☐ Direct Profile Push (LPA) ☐ Both

Supported Operations
Activate, suspend, resume, top-up, cancel

Webhook Support ☐ Yes ☐ No ☐ Not sure

Fallback Provider
Secondary provider for redundancy

4.2 Payments & Financial

Payment Gateway
Stripe, PayPal, Adyen, local — list all

Mobile Pay ☐ Apple Pay ☐ Google Pay ☐ Samsung Pay

Supported Currencies
List currencies. Dynamic FX?

Invoice Generation ☐ Automated ☐ Tax calc (VAT/GST) ☐ Not needed

Accounting Integration
QuickBooks, Xero, custom ERP?

Anti-Fraud ☐ 3D Secure ☐ Velocity checks ☐ Device fingerprint ☐ Manual review

4.3 Analytics & Marketing

Product Analytics
Mixpanel, Amplitude, PostHog, custom?

CRM Integration
HubSpot, Salesforce, custom?

Email / Push Service
SendGrid, Customer.io, Firebase, OneSignal?

Attribution / ASO
AppsFlyer, Adjust, Branch?

5. UI/UX & DESIGN

Brand Book / Style Guide ☐ Yes, ready ☐ In progress ☐ Need to create

Interface Style
Minimalist, bold, corporate, travel-lifestyle

Reference Apps / Sites
List 3-5 competitor or inspirational products with notes

Design Approach	☐ Unique custom ☐ Template adaptation ☐ Design system
Dark Mode	☐ Web + Mobile ☐ Mobile only ☐ Not needed
Accessibility (WCAG)	☐ AA required ☐ Nice to have ☐ Not required
Animation Level	☐ Basic ☐ Moderate ☐ Premium

6. PLATFORMS & DEPLOYMENT

Web Platform	☐ Responsive SPA ☐ SSR (Next.js) ☐ PWA
Mobile Platforms	☐ iOS ☐ Android ☐ Both
Mobile Framework	☐ React Native ☐ Flutter ☐ Native (Swift+Kotlin)
Min OS Versions *iOS 15+ / Android 10+ — specify*	
App Store Accounts	☐ Apple Developer ☐ Google Play ☐ Need to create
Tablet Optimization	☐ Dedicated layouts ☐ Responsive scaling

7. SECURITY & COMPLIANCE

Data Protection ☐ GDPR ☐ CCPA ☐ LGPD ☐ POPI ☐ Other

PCI DSS Level
SAQ-A or higher?

Data Residency
Requirements for physical data location?

Encryption ☐ TLS 1.3 in transit ☐ AES-256 at rest ☐ Custom

Auth Security ☐ MFA ☐ Biometric ☐ Device trust ☐ Login detection

API Security ☐ OAuth 2.0 ☐ API key rotation ☐ Webhook signatures

Anti-Fraud ☐ Velocity limits ☐ Device fingerprint ☐ Geo-anomaly

Pen Testing ☐ Before launch ☐ Annual ☐ Not planned

Certifications ☐ SOC 2 ☐ ISO 27001 ☐ Not required ☐ Planned

8. PERFORMANCE REQUIREMENTS

Confirm or adjust targets in the third column.

Metric	Target	Your Target
Page Load Time (Web)	*< 2 seconds (P95)*	
API Response Time	*< 200ms (P95)*	
App Cold Start	*< 3 seconds*	
Concurrent Users	*Specify target*	
eSIM Provisioning Time	*< 30 seconds e2e*	
Availability SLA	*99.95%*	
Load Testing	*3x expected peak (k6)*	

9. TIMELINE, BUDGET & DELIVERY

Target Launch Date
Hard deadline or flexible?

Budget Range (USD)
Approximate: development + infrastructure

Recommended Phased Delivery:

Phase	Scope	Timeline
Phase 1 — MVP	Core catalog, auth, payments, basic admin	8-12 weeks
Phase 2 — Beta	Analytics, AI support, referral system	4-6 weeks
Phase 3 — Prod	Perf tuning, security hardening, app store	4-6 weeks

MVP Scope Definition

What is the minimum feature set for initial launch?

Development Method

☐ Agile/Scrum ☐ Kanban ☐ Waterfall

Acceptance Criteria

QA, UAT sign-off, performance benchmarks

10. POST-LAUNCH SUPPORT & SCALING

Support SLA ☐ P1: 1h ☐ P2: 4h ☐ P3: 24h ☐ Custom

Maintenance Plan ☐ Monthly patches ☐ Quarterly updates ☐ On-demand

Monitoring ☐ 24/7 automated ☐ Business hours ☐ Self-managed

Scaling Roadmap
New markets, product lines, API marketplace, white-label?

Code Ownership ☐ Full source transfer ☐ Licensed access ☐ Managed by vendor

Infrastructure Ownership
Who manages production post-launch?

11. ADDITIONAL INFORMATION

Business Model Doc ☐ Ready to share ☐ In preparation ☐ Not available

Key Competitors
Main competitors and differentiation

Communication ☐ Slack ☐ Zoom ☐ Email ☐ Telegram

Sync Cadence
Weekly, bi-weekly, daily standups?

Contact Information

Technical Contact — Name

Role

Email

Phone

Business Contact — Name
